The smart and safe way to sign in

for schools, colleges and universities.

Simply ideal for schools and colleges

With a variety of features tailor-made to improve visitor management and staff or student sign in on education sites, Sign In App is perfect for schools, colleges and universities.

Sign in quickly from an iPad, smartphone, QR or RFID.

Keep attendance records easily, safely and accurately.

Easily comply with GDPR and safeguarding policies with all data stored securely.

Ensure everyone is accounted for in the event of an emergency.

Smart solutions for safer schools

Safety always comes first. We provide tools to help our Sign In App community protect guests, staff and pupils, all at no extra cost.

Safety + as standard

- Ask critical questions
- Manage entry requirements
- Create a block list

Safety+ evacuation reports

Nothing is more important than the safety of everyone on site. Efficient evacuations can save lives. With Safety+, no one is left behind.

- Central, real-time view of everyone on site
- Timed roll calls shared across devices
- Access from anywhere, on any device
- Manage evacuation points
- Review past evacuations

Configure Sign In App to suit your school

Configure groups to manage each of your different types of visitor. The sign in process can be customised for each group type to provide a streamlined experience.

Add custom data fields and tailor them to each type of visitor, giving you total control over the sign in experience and the data gathered (critical for data regulations such as GDPR).

Ensure visitors, staff and students read and accept important information such as health & safety notices plus safeguarding and privacy policies.

Sign In App connects to existing MIS systems

Intelligent connections with your existing MIS systems makes it easier than ever to accurately record sign in activity on your site.

- Sync pupil lists
- Handle late arrivals and early leavers
- Link teaching and support staff list
- Low annual cost
- SSO for portal users

Sign in with your door access fobs and cards

With one tap, staff can easily and securely sign in and out, simplifying the process and saving time for you and your staff members.

- Compatible with almost all RFID tags
- Attaches to our enclosures
- Connects via Bluetooth BLE
- Simple upgrade when purchased with a compatible stand

A secure, global infrastructure built around data privacy

Sign In App is committed to ensuring the security of your data. We are GDPR compliant and ISO27001 certified for Information Security Management.

Data retention options built in for total control of your data.

Auto-scaling infrastructure hosted in Tier 4 data centres.

Choose to store your data in one of four global regions.

Built for high availability - 99.99% uptime in 2021.

Staff and contractor sign in

Transform the sign in experience for employees and contractors, measuring staff attendance and hours and collecting the information you need.

Staff can sign in with our mobile Companion app, available on iOS and Android.

Produce timesheet reports and ensure staff safety.

Collect signed policies and documents and store them securely in your online portal.

Sync with Azure AD and Google Workspace.

The smart way to book desks and meeting rooms

Embrace the hybrid workforce and manage reduced site capacity with Spaces - the smart and flexible desk and meeting room booking add-on for Sign In App.

- Make any space bookable
- Reserve spaces from your phone
- Recreate layout or upload a floor plan
- Low annual cost

Case Study: Green Templeton College

Green Templeton College is a graduate community at the heart of the University of Oxford and strives towards its commitment to academic excellence. It brings together students, academics, and practitioners with a particular focus on business and management, health and medicine, and social sciences. With over 650 students and 80 university staff, as well as numerous suppliers and visitors potentially on site at any one time, Green Templeton College wanted to address community welfare and security by modernising its visitor management solution within its traditional Oxford setting.

Despite its wide range of accommodation and facilities, Green Templeton College did not have a visitor management system in place which was causing an array of challenges, such as the visibility of contractors on site and which staff

members were present around campus. As such, the College was looking to deploy a streamlined and secure system to keep track of all personnel on site and remove the opportunity for anyone to access the College's facilities that could pose a concern for those remaining on campus. Daniel Cooper, residential lodge manager, Green Templeton College comments: "When I started out in the position of Lodge Manager, I was very surprised that there was no stringent visitor management solution available so it was my priority to implement a robust solution as soon as possible. As a duty of care for the College, it is imperative that the array of people accessing the facilities always remain safe and secure. The solution from Sign In App provides a seamless way for the College to manage everyone allowing them to sign in and out via the portal placed at reception

or more conveniently by the ease of the downloadable app, ensuring that everyone – regardless of student, staff, or visitor – adheres to the same protocols." Initially, Green Templeton College deployed Sign In App primarily to understand the whereabouts of students and staff when it came to routine fire drills – to observe if they were signed into the building or not. Previously there was no way of quickly and accurately understanding how many individuals were on campus so it was routine to check all the hallways and communal rooms to ensure that everyone had evacuated quickly – a potentially

dangerous exercise in the event of an actual incident.

With the onset of Covid-19, tighter requirements and controls were implemented by Green Templeton College which relied on using Sign In App in a smart and robust way to ensure that regulations were adhered to within the overall setting. Quickly and efficiently, the College was able to target students at sign in stages and prompt them with a pre-populated health questionnaire allowing the College to keep a track and trace system and the virus at bay. In real-time, the College is able to use the array of visual dashboards and records to see who has signed in and out – particularly useful in the event of a fire evacuation.

Furthermore, management has the opportunity to drill down at a granular level and view individual responses to questionnaires, and are able to flag any results that could be a concern, such as if someone is declaring any Covid-19 systems.

Another area of deployment where Sign In App has generated insight is monitoring who accesses the health and fitness facilities – enabling the College to understand who is a repeat user or visiting for the first time. Using the system here

negates the need for any paperwork and ensures that students using the gym equipment have adhered to the waiver and gym rules prior to use. Cooper continues, “The biggest hurdle was getting senior management to embrace this period of change as they had initial fears that having a technology-based system in place could be overwhelming and questioned whether it could be adequately maintained. As I was able to explain the benefits of implementing a visitor management system and the multitude of problems it would overcome – any queries were quickly addressed and the tool rapidly set

up. Collectively within the College, we’ve set the standards high and many other facilities are looking at rolling this out too which is great to hear. From me, the key takeaways are how versatile the whole system can be and the level of functionality and reporting which is accessible for my role – such reporting requirements have been understandably exacerbated throughout Covid and ensures that duty of care is put first!” “In a nutshell, Sign In App was transformational for the College. I would thoroughly recommend taking the approach to all other educational institutions.”

Included in your site subscription

Contactless sign in

Sign in safely and securely

Evacuation lists

Ensure the safety of everyone on site

Video welcome screens

Bring the sign in experience to life

Deliveries

A total solution in one package

Online portal

Set up and monitor your sites online

Custom badges

Design and print badges for visitors
