

COMPUTEAM

CONNECT

We connect users to their applications and data whether in school or at home. These connections need to be fast, reliable and easy to manage

Connectivity Services

The internet is the single most important educational resource in any school.

We offer a range of connectivity speeds, complete with a fully managed web filtering solution that will keep pupils' safe online, whilst providing flexibility for teaching staff.

- Connections to suit all budgets – from FTTC to ultra-fast leased lines
- Minimum guaranteed speeds – 10Mbps – 1Gbps
- Managed firewall & co-managed filtering for ease of use

Our recommended packages comply with or exceed the latest eSafety advice from the UK Safer Internet centre, providing an extensive range of reports to help meet a school's obligations under the Prevent duty.

Wireless-as-a-Service

An investment in wireless provides a future-proof platform for the flexible deployment of technology in schools, but complex requirements and a lack of budget can prevent progress.

We provide an innovative Wireless-as-a-Service model, delivering these advanced features:

- Guaranteed coverage and speed for a fixed annual fee.
- Guest management for BYOD
- Active network scanning & NBD hardware swapout

Communication & Collaboration Tools

Technology should bring teachers, managers and pupils closer together by providing fast, efficient ways to communicate.

We help our clients achieve these aims by putting together a strategy incorporating:

- VoIP telephony to reduce costs and enhance voice communications
- Office365/Goggle G-Suite email migration & support services
- Assistance with online document sharing & collaboration
